HEALTHY LIVER AND GALLBLADDER SUPPORT

One of the easiest and most effective ways to nourish, cleanse and support the liver is with Artichoke Liver Cleanse. This highly effective herbal supplement supports the liver in its natural detoxification processes. Artichoke has been shown to help gently rid the liver of harmful toxins and support liver function.

Artichoke extract contains powerful bioflavonoids known for their detoxifying properties. It helps boost bile production, which facilitates the liver's natural cleansing and protects the liver while it releases accumulated toxins. After allowing the liver to cleanse and rebuild itself, it can better do its job of protecting the body from harmful substances.

Taking Artichoke Liver Cleanse can also help ensure healthy bowel movements and a healthy gut bacteria balance as bile is important to both of these functions. Artichoke Liver Cleanse contains Echinacea and Spirulina to nourish the immune system.

HOW TO USE:

Take 3 capsules per day. For a two week liver cleanse, take 3 capsules on an empty stomach in the morning and at bedtime each day for two weeks.
