## KEY BENEFITS:

- SUPPORT FOR IMMUNE CELL FUNCTION
- SUPPORTS NORMAL BOWEL FUNCTION
- SUPPORTS CELLULAR FUNCTION WITH POLYSACCHARIDES

## KEY INGREDIENTS:

- INULIN
- BETA-1,3-GLUCAN
- ACEMANAN FROM INNER LEAF ALOE VERA

## CLINTON HOWARD'S ORIGINAL FORMULA

VitAloe is a unique blend of research-backed ingredients that offers powerful support to your immune system. VitAloe combines plants and extracts that have traditionally been consumed for their immune enhancing properties, and it helps promote the growth of healthy bacteria in the digestive tract.

VitAloe has been expertly formulated to provide the most powerful polysaccharides from the miraculous Aloe vera plant. Clinton Howard, Founder of the RBC Life product line discovered that the key component of Aloe vera is a polysaccharide called mannose, which he later named Acemannan. His team found that Acemannan nourishes our white blood cells, which are a vital part of our immune system.

In an effort to further increase Acemannan's benefits, Mr. Howard combined this mannose concentrate with five other research-backed plants and extracts to create the powder supplement - VitAloe.

## HOW TO USE:

Mix one scoop in water or juice once daily.

### Supplement Facts

Serving Size: 1 scoop (5 g) Servings Per Container: 30

	Amount Per Serving	% Daily Value
VitAloe <sup>®</sup> Proprietary Complex	5 g	†
